***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Sacre (4776109).

Sacre shows an insert comprising a one piece plastic body (24) with a raised medial arch (at 32) with a cut out below with a plurality of vertical ribs (40) therein with shapes and thicknesses as claimed (as shown in figures 2 and 4).

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lin (4619056).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown (5722186) in view of Lin or Sacre.

Brown shows an insert comprising a non-compliant body (100) with a raised arch (at 110) and a bottom ridge (112) substantially as claimed except for ribs located under the raised arch portion. Either Lin or Sacre teaches providing ribs (20 or 40) beneath a

raised arch portion of an insert. It would have been obvious to provide ribs as taught by either Lin or Sacre in the arch portion of the insert of Brown to increase support and ventilation.
